Beneficial and unique opportunity for teachers to expand their curriculum!

Designed for K-12 educators, this workshop will cover activities on adaptation, natural history, and conservation status of raptors. The goal of this workshop is to give teachers a broader knowledge of Pennsylvania's birds of prey. Take part in activities and ideas to integrate raptors into your curriculum, followed by time outdoors to build raptor watching and identification skills.

Live birds and experts from the field join us for this workshop.

Dress for the indoors and weather outside, and bring a day pack with bag lunch and bottled water. Act 48 APPROVED.

Post Workshop Wildlife Watching Pontoon Program will be available at an additional \$10.00 fee and an extra Act 48 hour.
