

Male New Patient Package

The contents of this package are your first step
to restore your vitality.

Congratulations on taking interest in improving your overall health. In order to determine if you are a candidate for bio-identical hormone optimization, we need laboratory tests and your medical history. We will evaluate your information prior to your consultation to determine if these therapies can help you live a healthier life. **Please complete the following packet before your appointment.**

Please take time to read this carefully and answer all the questions as completely as possible.

I understand that if I begin testosterone replacement with any testosterone treatment, including testosterone pellets, that I will produce less testosterone from my testicles and if I stop replacement, I may experience a temporary decrease in my testosterone production. Testosterone Pellets should be completely out of your system in 12 months.

By beginning treatment, I accept all the risks of therapy stated herein and future risks that might be reported. I understand that higher than normal physiologic levels may be reached to create the necessary hormonal balance.
